What Is the PXT Select Sales Assessment?

As a comprehensive, “full person” assessment, the PXT Select Sales assessment measures how well an individual fits specific sales jobs in an organization by assessing their Cognitive Ability, Behavioral Traits, Interests and sales prospectives. The job-matching feature of the PXT Select Sales assessment enables organizations to evaluate an individual relative to the qualities required to perform in your sales roles successfully.

PXT Select Sales Helps You:

- Discover the stars within your organization. Pinpoint your current high-performing sales team members.
- Evaluate job candidates based on the attributes and traits of your top sales performers.
- Hire sales and service reps who share the same qualities as your best salespeople.

How Does PXT Select Sales Work?

Before assessing an individual, our team of experts helps you develop custom Occupational DNA® Sales Performance models for the sales jobs you need to fill. A performance model is a benchmark you will compare individuals against to establish the degree of Job-Person Fit. Once the performance model is established, candidates take the assessment online after receiving a link from the HR administrator or hiring manager.

The assessment can be taken from any device with internet access. The system instantly scores the assessment and sends the requested reports to the hiring manager. PXT Select Sales provides the manager with a suite of 13 reports they can use for hiring and selection, on-boarding, leadership development, coaching, succession planning, and more.
